

Self-Priming Deep Well Jet Pump

This self-priming jet pump is designed for deep well applications. It is engineered for efficient water lifting from significant depths, providing consistent pressure and flow.

Product Overview

High-Efficiency Deep Well Solution

This self-priming jet pump is engineered for reliable water extraction from deep sources, making it an ideal choice for residential, agricultural, and industrial water supply systems. Designed for wells with water levels between 10 and 20 meters, it combines robust construction with optimized impeller technology to ensure consistent pressure and flow. The unit features thermal protection for continuous duty, ensuring a long service life and dependable performance in demanding environments.

Performance Metrics

Flow Rate (Q)

20 l/min

Min Flow

90 l/min

Max Flow

Head Range (H)

5 m

Min Head

20 m

Max Head

Technical Specifications

Ingress Protection

IP44

Key Features

- Self-priming capability
- Thermal protection
- Continuous duty operation
- Robust impeller design

Power Output	1.1 kW
Horsepower	1.5 HP
Voltage	220V, 440V
Speed	2850 r/min
Rated Current	8.3 A
Frequency	50 Hz
