

Self-Priming Electric Fluid Transfer Pump

This self-priming electric pump is designed for transferring oil and other fluids. It features alligator clips for easy connection to a 12V or 24V power source and a compact design for portability.

Product Overview

Professional Fluid Transfer Solution

The YB1224 self-priming electric pump is a high-performance solution designed for reliable oil and fluid transfer in demanding environments. Engineered for versatility, it operates on both 12V and 24V power sources using convenient alligator clips for rapid deployment. Its compact, portable design with an integrated handle makes it an essential tool for automotive, marine, and industrial fluid management tasks.

Technical Specifications

Design Features

- Integrated carrying handle
- Compact form factor
- Alligator clip power connectors

Voltage Compatibility	12V, 24V
Pump Type	Self-Priming Electric

Applications

Industrial Applications

Automotive • Marine • Industrial
