

Self-Priming Garden Jet Pump

This self-priming garden jet pump is designed for efficient water supply in residential and garden applications. It features a durable construction with a stainless steel pump housing and a pressure tank for consistent water pressure.

Product Overview

High-Efficiency Garden Jet Pump

This self-priming garden jet pump is engineered for reliable water supply in residential and garden settings. Featuring a durable stainless steel housing, it is designed to handle clean water from wells, tanks, or streams. The integrated pressure tank and automatic pressure switch ensure consistent water flow and convenient, demand-based operation for irrigation and household boosting.

Technical Specifications

Housing Material	Stainless Steel
Operation Mode	Automatic (Pressure Switch)

Applications

Compatible Sources

- Wells
- Water Tanks
- Streams

Primary Applications	Irrigation, Household Water Supply, Pressure Boosting
----------------------	---

Key Features

Key Features

Self-Priming • Stainless Steel Housing • Automatic Start/Stop • Durable Construction
