

Self-Priming Jet Water Pump

This self-priming jet water pump is designed for efficient water transfer and pressure boosting in residential and light commercial applications. It features robust construction and a powerful electric motor, delivering reliable performance and long service life.

Product Overview

Reliable Water Transfer Solution

The JSW series self-priming jet water pump is engineered for efficient water transfer and pressure boosting in both residential and light commercial environments. Featuring robust construction and a powerful electric motor, this unit is designed to deliver consistent performance and a long service life. Its versatile self-priming capability allows for effective water extraction from shallow wells and tanks, making it an ideal choice for home supply, gardening, and small-scale irrigation systems.

Key Features

Maintenance

Easy Installation • Low Maintenance • Long Service Life

Ideal Applications

Residential Water Supply, Pressure Boosting, Garden Irrigation, Light Commercial Use, Shallow Well Extraction

Technical Specifications

Pump Type	Self-Priming Jet Pump
Motor Type	Electric
