

Self-Priming Multistage Centrifugal Water Pump

This pump is suitable for pumping clean water that is not chemically aggressive to the pump components. It is reliable, simple to use, and quiet, with applications in flow irrigation systems for gardening, agriculture, and industrial fittings.

Overview

Efficient Water Transfer Solution

The CMCP self-priming multistage centrifugal pump is designed for efficient water transfer and pressure boosting. Featuring a durable construction with a stainless steel pump body and impeller, it ensures long-lasting performance. Ideal for domestic water supply, irrigation, and industrial applications, it offers a compact design and easy installation. Its self-priming capability allows for quick start-up, even with air in the suction line.

Technical Specifications

Rotational Speed

2900 r/min

Speed

Insulation Class

Class B

Motor Type

Two-Pole induction motor

Protection Rating

IPX4

Features

Key Features

- Self-priming capability
- Stainless steel pump body
- Stainless steel impeller
- High-efficiency motor
- Quiet operation

Applications

Suitable Applications

Domestic water supply, Irrigation, Industrial applications, Pressure boosting
