

Self-Priming Peripheral Water Pump

This self-priming peripheral pump is designed for efficient water transfer and boosting. Its compact design and durable construction make it suitable for various applications, including domestic water supply, irrigation, and pressure boosting systems.

Product Overview

High-Efficiency Self-Priming Solution

This self-priming peripheral pump is engineered for reliable water transfer and pressure boosting applications. Featuring a robust design and corrosion-resistant materials, it ensures longevity even in demanding operational environments. Its peripheral impeller generates high pressure output at low flow rates, making it an excellent choice for domestic water supply and irrigation systems.

Technical Features

Self-Priming Capability	Yes
Pump Type	Peripheral

Application Suitability

Suitable Applications	Domestic Water Supply, Irrigation, Pressure Boosting
-----------------------	--

Design and Build

Construction
Corrosion-resistant • Compact Design • Robust Housing
