

Self-Priming Peripheral Water Pump

This self-priming peripheral pump is designed for pumping clean water without abrasive particles. It is reliable and simple to use, making it suitable for domestic applications such as water supply, pressure boosting, and irrigation.

Product Overview

Self-Priming Peripheral Water Pump

This self-priming peripheral pump is engineered for the efficient handling of clean water, free from abrasive particles and non-aggressive liquids. It offers a reliable and economical solution for various domestic needs, including water supply from wells, swimming pool maintenance, pressure boosting, and garden irrigation. Its simple design ensures easy operation for everyday use.

Technical Specifications

Fluid Compatibility

Clean Water • Non-Abrasive • Non-Aggressive

Pump Type

Self-priming peripheral

Suitable Applications

Domestic Water Supply, Well Water Extraction, Swimming Pools, Pressure Boosting, Gardening, Irrigation
