

Self-Priming Rotary Vane Oil Transfer Pump with Flow Meter

This self-priming rotary vane pump is designed for oil transfer. It features an integrated bypass valve and a mechanical flow meter for accurate dispensing.

Product Overview

Professional Oil Transfer Solution

The YB-T3 is a high-performance self-priming rotary vane pump designed for efficient oil transfer in demanding environments like workshops, construction sites, and agricultural settings. It features an integrated bypass valve and a precision mechanical flow meter, ensuring accurate dispensing for every task. Housed within a robust steel frame for maximum portability and durability, this system comes fully equipped with hoses and fittings for immediate deployment.

Performance Specifications

Performance Metrics

50 L/min

Flow Rate

2 bar

Max Pressure

1 %

Meter Accuracy

Technical Details

Power Supply	230V AC
Inlet/Outlet Size	1 inch BSP

Features

Key Features	Self-priming, Rotary Vane Mechanism, Integrated Bypass Valve, Mechanical Flow Meter, Portable Steel Frame
--------------	---

Application

Recommended Applications

- Automotive Workshops
- Construction Sites
- Agricultural Operations
