

Self-Priming Vortex Pump

This self-priming vortex pump is designed for efficient water transfer and pressure boosting. It features robust construction for durability and a long service life across various applications.

Product Overview

High-Efficiency Self-Priming Vortex Pump

This self-priming vortex pump is engineered for superior water transfer and pressure boosting across a wide range of operational environments. Designed with a robust architecture to ensure long-term durability, it provides consistent performance for residential, commercial, and industrial water systems. Its advanced hydraulic design ensures reliable operation even in demanding fluid handling applications.

Technical Specifications

Performance Highlights

130 PS

Model Capacity

Product Capabilities

Self-Priming, Vortex Impeller, Pressure Boosting, Robust Construction

Application Suitability

Suitable Environments

- Residential water systems
- Commercial facility water supply
- Industrial fluid transfer
- Pressure boosting applications
