Self-Priming Water Pump

This self-priming water pump is designed for applications such as irrigation and construction. It is also suitable for emergency water transfer, pumping clean or slightly dirty water.

Product Overview

Professional Self-Priming Water Pump

This high-performance self-priming water pump is engineered for demanding tasks, including agricultural irrigation, construction site dewatering, and emergency water transfer operations. It features a robust housing and a reliable engine designed for quick, easy starts even in challenging environments. The versatile design is capable of handling both clean and slightly dirty water, making it a dependable solution for diverse professional applications.

Key Features

Performance Capabilities	Self-Priming, Construction Ready, Irrigation Optimized, Easy Start System, Durable Construction

Operational Details

Water Compatibility

Clean Water • Slightly Dirty Water

Primary Applications

- Agricultural Irrigation
- Construction Dewatering
- Emergency Water Transfer
