

# Self-Priming Water Pump

This self-priming pump efficiently moves fluids. Its design allows it to draw liquid without needing to be manually primed.

## Product Overview

### Industrial Evaporator Performance

This industrial-grade evaporator unit is specifically engineered for high-performance refrigeration and climate-controlled applications. Featuring a dual axial fan configuration, the system ensures consistent airflow and superior heat exchange efficiency. Its robust construction is designed to withstand the rigorous conditions of cold storage facilities and walk-in freezers, providing reliable cooling capacity across a variety of refrigerant types.

## Technical Specifications

### Integrated Components

- Dual axial fans
- High-efficiency heat exchanger coil
- Industrial-grade housing

### Mounting Configuration

Ceiling-mounted

## Application Suitability

### Compatibility

Multi-refrigerant capable

### Ideal Environments

Cold storage rooms, Walk-in freezers, Temperature-controlled warehouses
