

Self-Priming Water Pump with Pressure Tank

This self-priming water pump is coupled with a pressure tank for consistent water pressure. It is designed for residential and light commercial water supply, featuring a cast iron housing and automatic operation.

Product Overview

High-Efficiency Self-Priming System

The Specialty Pump 7-007 is an integrated water supply solution designed for residential and light commercial use. By combining a robust self-priming pump with a pressure tank, this unit ensures consistent flow and reliable performance for plumbing fixtures. Its cast iron construction offers durability, while the pre-installed pressure switch and gauge allow for seamless monitoring and automatic operation.

Technical Details

System Components

- Self-priming pump
- Pressure tank
- Automatic pressure switch
- Integrated pressure gauge

Installation Status

Pre-charged • Ready-to-install

Housing Material

Cast Iron

Application

Application Scope

Residential, Light Commercial, Water Supply
