

Self-Priming Water Transfer Pump

This self-priming pump is designed for efficient water transfer and boosting. It features a robust motor and durable construction for reliable performance in various applications.

Product Overview

Professional Water Transfer Solution

This self-priming water transfer pump is engineered for high-efficiency liquid movement and pressure boosting. Its robust motor design ensures reliable operation in diverse environments ranging from domestic water supply to agricultural irrigation and light industrial applications. With advanced self-priming capabilities, it provides consistent performance and easy start-up, even in systems with intermittent flow.

Technical Features

Operational Advantages

- Self-priming capability for reliable start-up
- Quiet operation profile
- Durable construction for long service life
- Consistent performance under intermittent flow

Suitable Applications

Domestic Water Supply, Irrigation, Industrial Use, Pressure Boosting
