Product Overview

High-Efficiency Agricultural Spraying Solution

This self-propelled agricultural boom sprayer is engineered for precision and productivity in diverse field conditions. Featuring a high-clearance chassis and an intuitive electro-hydraulic control system, it minimizes crop damage while maximizing operator comfort and ease of use. Designed for versatility, the unit supports both spraying and fertilization tasks, making it a robust, dual-purpose asset for modern farming operations.

Performance & Engine

Engine Power

50 hp

Rated Power

Engine Options

Changchai, XinChai, QuanChai

Capacity & Efficiency

Pesticide Tank Capacity

- 700
- 800

Stirring Device

Yes

Design & Operation

Operator Safety Features

Raised driving seat • Pesticide exposure reduction

Ground Clearance

1100 mm

Control Interface

Electro-hydraulic push rod with steering wheel-mounted electric controls

Versatility

Supported Applications

Spraying, Fertilization

Monitoring Systems

Double alarm function for pesticide tank and fertilizer hopper
