Self-Propelled Agricultural Spray Machine

This self-propelled spray machine is designed for efficient spraying applications. Featuring a durable frame, high-pressure pump, and adjustable nozzles, it ensures precise application of liquids across various terrains.

Product Overview

Professional Self-Propelled Agricultural Sprayer

The SFZ-30 series agricultural spray machine is a robust, self-propelled solution designed for efficient field, orchard, and vineyard maintenance. Featuring a high-pressure pump system powered by a reliable gasoline engine, it allows for the precise application of pesticides, herbicides, and fertilizers. Its maneuverable design, large wheels, and corrosion-resistant tank construction ensure long-term durability and ease of use in diverse agricultural environments.

Technical Specifications

Performance Metrics

24 L/min	5 mpa	4 kw
Max Suction Capacity	Max Pressure	Power Output

Article Number	SFZ-30-150L/180L
Engine Power Rating	5.5ps
Suction Capacity Range	21.5 - 24 L/min

Key Features

Operational Highlights

- Self-propelled chassis for easy navigation
- Corrosion-resistant tank construction
- Adjustable spray nozzles for precise application
- Variable pressure settings
- Integrated gasoline engine system
