

# Self-Propelled Boom Lift for Agriculture

This is a self-propelled boom lift designed for agricultural construction. It features a work platform surrounded by safety rails and heavy-duty tires for rough terrain.

## Product Overview

### Versatile Agricultural Access Solution

This self-propelled boom lift is engineered specifically for agricultural construction and maintenance tasks. Featuring a robust work platform equipped with safety rails, it provides reliable vertical access for operators. Designed for durability, the unit utilizes heavy-duty tires capable of navigating rough terrain, making it an essential tool for demanding outdoor agricultural environments.

## Technical Specifications

Lift Type	Self-Propelled Boom Lift
Primary Application	Agriculture, Construction, Maintenance

## Design & Safety
