

Self-Propelled Gasoline Lawn Mower

This self-propelled lawn mower is designed for residential lawn maintenance. It features a gasoline-powered engine, a cutting deck with four wheels, a rear-mounted grass collection bag, and an adjustable handle.

Product Overview

Professional Performance

This self-propelled gasoline lawn mower is engineered for efficient and reliable residential lawn maintenance. Featuring a robust gasoline-powered engine and a highly maneuverable four-wheel cutting deck, it ensures consistent cutting performance across various terrains. The inclusion of an adjustable handle and a rear-mounted collection system enhances user comfort and operational convenience.
