

Self-Propelled Outdoor Sweeper

This self-propelled sweeper is a professional-grade machine suitable for clearing amenity areas and winter roads. Equipped with a 7HP engine and a double brush system, it efficiently gathers loose dirt and sweeps surfaces, and can also be used for snow removal with appropriate attachments.

Product Overview

Professional Performance Sweeper

The WBSW1007B is a high-efficiency garden machine engineered for professional amenity area maintenance and winter road clearance. This robust unit excels at gathering loose dirt and debris, while also serving as a capable snow-clearing machine when equipped with specialized attachments. Its self-propelled design ensures ease of operation and significantly reduces operator fatigue during extended use.
