

Self-Propelled Vertical Mast Lift

This self-propelled vertical mast lift is designed for indoor use on flat surfaces. It features a compact footprint for maneuvering in tight spaces, a platform for one person, and a vertical mast for reaching elevated work areas.

Overview

Compact Vertical Access Solution

This self-propelled vertical mast lift is engineered specifically for indoor maintenance, installation, and order picking tasks on flat surfaces. Its compact footprint allows for seamless operation in tight, confined spaces where maneuverability is critical. Designed for efficiency and safety, the unit provides a quiet, emission-free, and reliable way to reach elevated work areas.

Performance & Safety

Ideal Environment

Indoor Use • Flat Surfaces

Safety Features

Guardrails, Non-marking tires, Emergency stop controls

Power Source

Electric

Usage

Primary Applications

- Maintenance
- Installation
- Order picking
