

Self-Propelled Walk Behind Sweeper

This self-propelled sweeper is powered by a 5HP engine. It is designed for gathering loose dirt, cleaning gardens, and clearing winter pathways with optional attachments.

Product Overview

Versatile Multi-Season Sweeping Solution

The WBSW705 is a robust, self-propelled walk-behind sweeper engineered for efficient debris removal and winter maintenance. Equipped with a reliable 5HP engine and a durable double-brush system, it excels at clearing loose dirt from gardens and pathways. Its design allows for easy conversion into a snow-clearing machine when paired with appropriate attachments, providing year-round utility for residential and commercial surfaces.
