

Self-Starting Step Drill Bit for Single Hole Sizes

This step drill bit is designed for creating single-sized holes. It features a self-starting tip for accurate drilling without the need for a pilot hole.

Product Overview

Self-Starting Step Drill Bit

This step drill bit is engineered for creating precise, single-sized holes with ease. Featuring a specialized self-starting tip, it eliminates the need for a separate pilot hole, allowing for accurate and efficient drilling from the start. Its robust design ensures clean, professional results across various materials, making it a versatile tool for demanding drilling tasks.

Technical Specifications

Drilling Capabilities

- Accurate hole placement without pilot holes
- Clean and precise finishing
- Multi-material compatibility

Measurement System	Inch
Key Features	Self-Starting Tip, Single Hole Sizing, Precision Drilling
