Product Overview

Professional Sanitation Solution

This self-suction sewage truck is engineered to provide efficient waste management for both municipal and industrial applications. Designed for reliability, the vehicle features a large-capacity tank and a powerful vacuum system capable of clearing sewers and septic systems with ease. Its robust chassis and heavy-duty suspension ensure consistent performance and stability across a variety of demanding terrains.

Technical Capabilities

Core Functions

- Liquid waste transportation
- Solid waste collection
- Deep sewer and septic suction
- Industrial sanitation support

Operational Advantages

Heavy-Duty Chassis, High-Capacity Tank, Vacuum System, Industrial Grade
