Product Overview

Precision Auger Filling Technology

This semi-automatic auger filling machine provides a professional solution for accurate measurement and packaging of powder and tiny granule products. Engineered with high-performance servo motor and driver control, it ensures consistent filling precision and long-term operational durability. Designed to meet stringent GMP standards, this equipment is an ideal asset for food, pharmaceutical, and chemical industries.

Technical Specifications

Filling Range	5000 g
Filling Accuracy	1 %
Filling Speed	10-30 bags or bottles/min
Voltage	380V 50/60HZ
Power	1.5 W
Weight	190 kg

Physical Dimensions

Overall Dimensions (L*W*H)	930 * 980 * 1970 mm
----------------------------	---------------------

Applications

Compatible Products	Milk Powder, Protein Powder, Flour, Solid Beverage, Cocoa Powder, Sugar, Pharmaceutical Raw Material, Pesticides, Food Additives, Dyes
---------------------	--

Compliance

GMP Standards	Yes
