Product Overview

Professional Carton Sealing Solution

This semi-automatic carton sealing machine provides a reliable and precise solution for corrugated box packaging. Designed for smooth, high-stability operation, it automatically applies adhesive tape to both the upper and lower sides of boxes simultaneously. With its adjustable structure, it serves as a versatile tool for various industrial packaging needs, ensuring professional and secure results for every shipment.

Technical Features

Key Functionalities

- Automatic steering
- Upper and lower side tape sealing
- Adjustable width and height settings
- Roller conveyor system for smooth movement
- Manual adjustment cranks

Operation Modes

Wiring integration, Stand-alone operation
