

Semi-Automatic Cuff Type Coating and PE Shrink Packaging Machine

This semi-automatic machine integrates cuff-type coating and PE shrink packaging processes. It is designed for efficient and reliable packaging solutions for various product sizes and shapes.

Overview

Professional Packaging Solution

The BZJ5038 is a robust semi-automatic packaging machine engineered for cuff-type coating and PE shrink packaging. By integrating both coating and shrinking processes into a single workflow, it delivers reliable and efficient packaging for a wide variety of product sizes and shapes. Designed with user-friendly controls and adjustable operational parameters, it ensures consistent, high-quality shrink wrapping results for industrial applications.

Technical Specifications

Machine Type	Semi-Automatic Cuff Type Coating and PE Shrink Packaging Machine
Model Number	BZJ5038

Operational Features

Safety Systems

- Emergency stop buttons
- Thermal overload protection

Adjustable Parameters	Temperature Control, Conveyor Speed
Operation Interface	User-friendly control panel for easy operation and monitoring
