

Semi-Automatic Piston Ketchup Filling Machine

This semi-automatic ketchup filling machine is designed for accurate and efficient filling of ketchup and similar viscous products. It features a stainless steel hopper and utilizes a pneumatic piston system for precise volume control, adjustable for various container sizes.

Product Overview

Precision Filling for Viscous Liquids

This semi-automatic piston filling machine is expertly engineered for the precise filling of ketchup and other high-viscosity pastes. Featuring a durable stainless steel hopper and a pneumatic piston system, it ensures consistent volume control and easy sanitation. The unit is designed to optimize small to medium-scale production workflows through its adjustable speed and container-compatible filling nozzle.

Technical Specifications

Filling Mechanism	Pneumatic Piston
Application Compatibility	Ketchup, Viscous Pastes, Liquids
Material	Stainless Steel

Operational Features

Key Features

- Adjustable filling volume
- Adjustable filling speed
- No-drip nozzle technology
- Easy-clean hopper design

Production Scale

Small-Scale • Medium-Scale
