Machine Overview

Industrial Semi-Automatic Blow Molding

This semi-automatic blow molding machine is engineered for high-performance production of plastic bottles and containers. Designed for versatile industrial use, it features a robust build and an intuitive control interface for precise operational adjustments. It prioritizes energy efficiency and safety, making it a reliable solution for various packaging and beverage production requirements.

Operational Features

Control System	User-friendly control panel for precise adjustments
Product Compatibility	Beverage Bottles, Juice Containers, Tea Bottles, Custom Shapes
