

Semi-Automatic Shrink Wrapping Machine

This semi-automatic shrink wrapping machine is designed for packaging various products. It features adjustable temperature control and a shrink tunnel to ensure tight and secure wrapping.

Product Overview

Professional Semi-Automatic Shrink Wrapping Solution

This semi-automatic shrink wrapping machine is designed to provide efficient and secure packaging across diverse industries including pharmaceuticals, food, beverage, and cosmetics. Equipped with precise temperature controls and a reliable sealing and cutting mechanism, it ensures a tight, professional finish for your products. The unit is versatile, supporting various shrink film types such as PVC, PP, and POF to suit specific packaging needs.

Technical Specifications

Available Model Variants

- HS-5035A
- HS-5035B
- HS-5035C
- HS-5035D
- HS-5035E

Compatible Film Materials

PVC, PP, POF

Key Features

System Capabilities

- Adjustable temperature control
- Integrated sealing and cutting mechanism
- High-efficiency shrink tunnel
- Scalable for different product sizes and volumes

Application Suitability

Target Industries

Pharmaceuticals • Food & Beverage • Stationery • Ceramic • Cosmetic • Mobile Fittings • Textile • Electric Media
