

# Semi-Automatic Strapping Machine

This packaging machinery is a semi-automatic strapping machine for securing packages with plastic straps. It features a compact design with a lever-operated tensioning and sealing mechanism and adjustable guides.

## Overview

### Professional Strapping Solution

This semi-automatic strapping machine is engineered for efficient package securing in industrial environments. Featuring a compact and robust design, it includes adjustable guides to accommodate a variety of package sizes. The lever-operated tensioning and sealing mechanism ensures reliable performance for daily packaging operations.

## Technical Specifications

### Suitability

Industrial Use • Package Securing

Operation Mode	Semi-Automatic
Design Features	Compact Design, Adjustable Guides, Industrial Grade
Mechanism	Lever-operated tensioning and sealing
