Product Overview

Efficiency in Material Handling

This semi-electric pallet stacker is a versatile material handling solution designed to increase warehouse productivity. By combining manual maneuverability with a powerful electric lifting mechanism, it allows operators to handle palletized loads with minimal physical effort. Its compact construction makes it an ideal choice for navigating tight spaces, loading vans, and optimizing storage processes.

Performance

Load Capacity Range

500 kg Minimum Capacity	1000 kg Maximum Capacity
-----------------------------------	------------------------------------

Maximum Lifting Height

1.6 m

Design and Build

Operational Mode

Manual Push/Pull, Electric Lift

Build Quality

Robust steel frame

Safety and Features

Included Safety Features

- Safety brake system
- Maintenance-free battery
- Adjustable forks
- User-friendly control system

Applications

Ideal Applications

Warehouse Logistics • Vehicle Loading • Pallet Stacking • Industrial Environments
