

Semi-Flexible Solar Panel

This semi-flexible solar panel is a high-efficiency photovoltaic module designed for applications requiring flexibility and durability. Its lightweight and thin profile allows for easy integration onto curved surfaces.

Product Overview

High-Efficiency Flexible Solar Technology

This solar panel is engineered for versatility and durability, utilizing advanced materials to ensure high performance in diverse environments. Featuring a unique grain design to minimize reflection and maximize sunlight absorption, it is built to withstand hail and harsh weather conditions. Its 15-degree bendable profile allows for seamless integration onto irregular surfaces such as marine boats, RVs, and tents.

Technical Specifications

Bend Radius	15 degrees
Surface Material	Japan-imported ETFE

Features & Benefits

Ideal Applications

- Marine Boats
- RVs
- Roofs
- Tents
- Irregular Surfaces

Key Features	Semi-Flexible, Hail Resistant, Anti-Reflective, Weather Resistant
