

Semi-Round Bottle Label Applicator

This semi-round bottle labeling machine is designed for precise application of labels to semi-round or curved bottles. It provides consistent labeling results for various bottle sizes and label types.

Product Overview

Professional Semi-Round Bottle Labeling Solution

This high-precision labeling machine is engineered for the efficient application of labels onto semi-round or curved bottle surfaces. It features a robust, industrial-grade construction designed for reliability and ease of maintenance in demanding production environments. With integrated sensors and a synchronized feeding mechanism, it ensures consistent, accurate placement for various label types and bottle dimensions.

Technical Specifications

Key Functional Features

- Adjustable labeling head speed and position
- Automated bottle feeding mechanism
- Synchronized label dispensing system
- Integrated label and bottle presence sensors

Suitable Industries

Food and Beverage, Pharmaceuticals, Cosmetics, Chemicals

Operational Features

Design Advantages

- User-friendly interface for easy adjustments
- Robust construction for long-term reliability
- Easy access to components for maintenance and cleaning
- High versatility for varying bottle sizes
