

Serrated Blade Sickle with Wooden Handle

This sickle is a hand-held agricultural tool with a curved, serrated blade, typically used for harvesting crops or cutting grass and vegetation. It features a wooden handle for a comfortable grip and a durable steel blade for longevity.

Product Overview

Professional Serrated Harvesting Tool

This handheld agricultural sickle is designed for efficient harvesting, grass trimming, and vegetation management. It features a high-durability steel blade with a serrated edge for precision cutting and a natural wooden handle to provide a comfortable, ergonomic grip during prolonged use. Built to withstand wear in small-scale farming and landscaping environments, this tool offers reliable performance for daily gardening and field tasks.
