

Serrated Edge Snips with Soft Grip

These snips feature premium alloy steel serrated edge blades for enhanced cutting performance and durability. They are equipped with a protective safety latch to ensure secure storage and prevent accidental opening.

Product Overview

Professional Grade Serrated Edge Snips

These professional snips are engineered with high-quality alloy steel blades featuring serrated edges for maximum cutting performance and material grip. Designed for reliability in demanding environments, they include a built-in safety latch for secure storage and an ergonomic soft-grip handle to minimize user fatigue. They serve as an ideal tool for efficiently cutting sheet metal, vinyl siding, and plastics.

Technical Specifications

Safety Mechanism

Protective safety latch

Blade Material

Premium alloy steel

Blade Features

Serrated edge, High durability, Enhanced grip

Ergonomics & Design

Handle Design

Ergonomic non-slip soft grip

Applications

Compatible Materials

- Sheet metal
- Vinyl siding
- Plastics
