

Serrated Replacement Blades for Garden Tools

This set contains four serrated, triangular metal blades. They are designed as replacement parts for garden tools, suitable for cutting and reaping.

Product Overview

High-Performance Serrated Blades

These serrated replacement blades are engineered for robust cutting and reaping applications in gardening and agricultural environments. Designed with precision, the triangular serrated edges ensure efficient performance, while the reinforced mounting base allows for secure attachment to compatible tools. This set offers versatile sizing options to accommodate various cutting widths, making it an essential maintenance component for professional landscaping equipment.
