Overview

Robust Server Cabinet Enclosure

The FCC-D Server Cabinet is a robust and versatile enclosure designed to house and protect critical server equipment. Constructed with a heavy-duty steel frame, it offers exceptional stability and durability, making it ideal for data centers, server rooms, and network closets. The cabinet features perforated doors and panels for optimal airflow, adjustable mounting rails for flexible configuration, and integrated cable management to ensure organized wiring.

Key Features

Heavy-duty steel frame, Perforated doors, Adjustable mounting rails, Cable management, Lockable security, Mobility casters, Leveling feet
