

Servo Motor for Automation

This servo motor offers high efficiency, low noise, and low vibration. It is designed for reliable and long-life operation in warehousing logistics, packaging machinery, and machine tools.

Overview

High-Performance Servo Motor

This high-performance servo motor is designed for precision motion control applications in industrial environments. It features a robust construction that delivers high torque density and excellent dynamic response. Ideally suited for robotics, automation, and complex industrial machinery, this motor ensures accurate and reliable performance for demanding operations.

Technical Specifications

Power Input Range

0.5 kW

Minimum Power

4.2 kW

Maximum Power

Rated Torque Range

2 N.m

Minimum Rated Torque

13 N.m

Maximum Rated Torque

Model Series

01 to 13
