Product Overview

Robust Wastewater Management

The TS series sewage lifting station provides a durable and efficient solution for handling wastewater in residential, commercial, and industrial environments. Engineered with a corrosion-resistant polyethylene tank and high-performance submersible pumps, the system ensures reliable elevation of sewage for proper disposal. This pre-assembled unit minimizes installation time and includes an integrated control panel for automated monitoring and peace of mind.

Technical Specifications

Winding Insulation

Class F

Pump Capabilities

- Shaft extension and coupling meet NEMA standards
- Rewindable stator
- Corrosion-resistant construction
- Dual pump configuration for redundancy

Maximum Immersion Depth

150 m

Compliance and Standards

NEMA, FDA, Foodstuff Oil Standards

System Features
