

Sewage Suction Truck for Waste Removal

This light-duty sewage suction truck is designed for efficient waste removal and transportation. Equipped with a rear discharge valve for controlled emptying, the truck is ideal for municipal sanitation, environmental services, and industrial cleaning applications.

Product Overview

Professional Waste Management Solution

This light-duty sewage suction truck is engineered for efficient waste removal and transportation in complex environments. Featuring a compact chassis design, it offers superior maneuverability for urban municipal sanitation and industrial cleaning. The unit is equipped with a high-capacity sealed tank and a high-performance vacuum system to ensure leak-proof, rapid, and hygienic waste extraction.

Technical Specifications

Key Features

- Compact chassis design for urban maneuverability
- Sealed tank construction to prevent leaks and odors
- Powerful vacuum pump for high-efficiency suction
- Rear discharge valve for precision emptying

Operational Status

Vacuum Ready • Sealed System • Rapid Suction

Primary Applications

Municipal Sanitation, Environmental Services, Industrial Cleaning
