

Sewing Machine Rotary Motor

This circular sewing machine motor is designed for specialized sewing applications. It features a rotary design with precision components for automated stitching.

Product Overview

Industrial Rotary Sewing Motor

This high-performance rotary motor is engineered specifically for specialized industrial sewing applications. It features a precision-focused design that ensures controlled movement and consistent stitching patterns, making it ideal for automated stitching environments. Built for durability and continuous operation, the motor includes an integrated needle positioning system and adjustable settings to accommodate various fabric types and stitch densities.

Technical Specifications

Compatible Model Series

- DB-2000
- DB-2000S
- DB-2000H
- DB-2000SH
- DB-2000T
- DB-2000ST
- DB-2000HT
- DB-2000SHT

Primary Application

Computer Round Edge Sewing • Industrial Sewing

Performance Features

Key Capabilities

Needle Positioning System, Adjustable Stitch Density, Continuous Operation, Automated Stitching
