

Shaded Pole AC Motor

This shaded pole motor features a squirrel cage rotor and a cooling fan. It is designed for use in space heating apparatus and other household electrical appliances.

Product Overview

High-Efficiency Shaded Pole AC Motor

This shaded pole AC motor features a reliable squirrel cage rotor and an integrated cooling fan for optimal thermal management. Engineered for durability, it provides a compact solution for space heating equipment and common household electrical appliances. It is specifically designed for applications that require low starting torque and consistent, reliable speed operation.

Technical Specifications

Typical Applications

- Space heating apparatus
- Household electrical appliances
- Constant speed applications

Motor Type	Shaded Pole AC Motor
Core Features	Squirrel Cage Rotor, Integrated Cooling Fan, Compact Design, Low Starting Torque

Operational Characteristics

Operating Mode	Constant Speed
Starting Torque Profile	Low
