

Shaded Pole Motor for Appliance Applications

This shaded pole motor is designed for low-torque applications within household appliances. It operates on 120V AC at 60Hz, consuming only 1W of power.

Product Overview

Compact Performance for Kitchen Appliances

This shaded-pole motor is engineered for reliability in low-torque household appliance applications. Featuring a robust enclosure and durable mounting hardware, it is specifically designed to withstand the operational demands of electric ovens and similar kitchen equipment. Its compact form factor ensures easy integration into space-constrained designs.

Electrical Specifications

Power Consumption

1 W

Rated Power

Rated Voltage	120 V
Frequency	60 Hz

Identification

Country of Origin

China

Production Information

- Batch tracking enabled
- Lot number: 5409

Model Number	YD6030
