

Shaded Pole Motor for Electric Ovens

This shaded pole motor is designed for electric ovens and other kitchen appliances. Its compact design provides reliable and efficient operation for various applications requiring low starting torque.

Product Overview

Compact Motor for Kitchen Appliances

This shaded pole motor is specifically engineered for use in electric ovens and various professional kitchen appliances. Its compact design ensures a small footprint while providing reliable, efficient operation for applications requiring low starting torque. Built with durable materials, the motor is designed for longevity and consistent performance even in the demanding thermal environments of an oven.

Technical Specifications

Primary Applications

- Electric ovens
- Cooling fans
- Rotisserie/rotating spits

Performance Features

Low starting torque, Compact design, High-durability construction, Thermal-resistant
