

Shaded Pole Motor for Home Appliances

This series motor is widely used in fan heaters, electric ovens, fireplaces, dehumidifiers, and ventilators, among other home appliances. It provides a simple and cost-effective motor solution for various applications.

Product Overview

Compact Shaded Pole Solution

The YJ61 series shaded pole motor is a robust and reliable electric motor engineered for optimal performance in small home appliances. Its self-starting design and compact form factor make it an ideal choice for fan heaters, electric ovens, and dehumidifiers. Built with high-quality components, it provides a cost-effective and dependable power solution for various ventilation and heating requirements.

Technical Specifications

Model Series	YJ61 Series
Motor Type	Shaded Pole
Primary Applications	Fan Heaters, Electric Ovens, Fireplaces, Dehumidifiers, Ventilators

Construction

Design Features

- Robust gray-colored motor housing
- Copper windings
- Silver-colored mounting bracket
- Threaded shaft for secure attachment
- White plastic base for connections
