

Shaded Pole Motor for Oven

Compact shaded pole motor designed for electric ovens. It features robust construction for reliable performance.

Product Overview

High-Performance Oven Motor

This compact shaded pole motor is specifically engineered for electric ovens and high-demand kitchen ventilation applications. Its robust construction ensures long-term reliability and consistent performance in elevated temperature environments. Designed for quiet operation and minimal vibration, this motor provides an efficient solution for cooling and airflow requirements.

Technical Specifications

Performance Features

- Robust construction for longevity
- Optimized for thermal efficiency
- Low-noise operation
- Reduced mechanical vibration

Motor Type	Shaded Pole Motor
Primary Applications	Electric Ovens, Kitchen Appliances, Cooling Systems, Ventilation
