

Shaded Pole Motor for Oven Appliances

This shaded pole motor is designed for use in electric ovens and other kitchen appliances. It operates on AC power, providing consistent rotational force for various oven functions like convection fans or rotisserie mechanisms.

Product Overview

High-Performance Shaded Pole Motor

This shaded pole motor is precision-engineered for electric ovens and diverse kitchen appliances requiring consistent rotational force. Its compact and durable design ensures reliable, long-term performance even in demanding cooking environments. Designed for quiet operation, it is an ideal solution for convection fans and rotisserie mechanisms where reliability and cost-effectiveness are paramount.

Technical Specifications

Design & Construction

- Compact form factor
- Durable construction
- Quiet operation
- Shaded pole topology

Primary Applications

Electric Ovens, Convection Fans, Rotisserie Mechanisms, Kitchen Appliances

Power Type

AC Power

Performance

Operational Capabilities

1 Continuous
