

Shaded Pole Motor for Refrigeration

This shaded pole motor is designed for refrigerators and refrigeration equipment. It can be used as a replacement part or in new refrigeration system designs.

Product Overview

High-Efficiency Shaded Pole Motor

This shaded pole motor is a highly reliable component designed specifically for refrigeration equipment and cooling systems. It is engineered for consistent performance across both 110V and 220V applications, making it a versatile choice for global market standards. With its robust construction and wide usage in international refrigeration systems, this unit serves as an ideal solution for both original equipment manufacturing and replacement part requirements.

Electrical Specifications

| | |
|-----------------------|-----------------|
| Voltage Configuration | 110V, 220V-240V |
| Operating Frequency | 50 Hz |

Physical Dimensions

Key Dimensions (mm)

| Dimension | Measurement |
|----------------|-------------|
| Shaft Diameter | 4.76 |
| Motor Width | 40 |
| Face Width | 60.5 |
| Overall Height | 75.5 |
