

Shaded Pole Motor for Ventilation Equipment

This shaded pole motor is commonly used in air conditioners and ventilation equipment. It features a robust construction with a metallic housing and mounting brackets with rubber vibration isolators.

Product Overview

Reliable Shaded Pole Motor for HVAC

This shaded pole motor is engineered for high reliability and quiet operation in ventilation equipment and air conditioning systems. Featuring a robust metallic housing and integrated rubber vibration isolators, it is designed to minimize noise while maintaining consistent performance. It is an ideal solution for manufacturers seeking a durable motor for fan or blower applications.

Key Performance Metrics

Performance Highlights

40 W Output Power	220 V Voltage	50 Hz Frequency
-----------------------------	-------------------------	---------------------------

Electrical Specifications

Rated Voltage	220 V
Rated Current	0.22 A
Frequency	50 Hz
Power Consumption	40 W

Technical Details

Insulation Class Class E	
Model Number	YX35-35-4

Construction & Design

Vibration Control <ul style="list-style-type: none">Mounting brackets includedRubber vibration isolators	
Housing Material	Metallic housing

Applications

Recommended Use	Air Conditioners, Ventilation Equipment, Fans, Blowers, HVAC Systems
