

Shaded Pole Motor for Window Air Conditioners

This shaded pole motor is designed for window air conditioners. It features a compact, fully enclosed construction with a durable metallic finish and is equipped with mounting flanges and a shaft for fan blade attachment.

Product Overview

High-Efficiency Shaded Pole Motor

This shaded pole motor is specifically engineered for window air conditioning units, offering a reliable solution for climate control systems. Featuring a robust, fully enclosed construction with a durable metallic finish, it is built to withstand continuous operation. The unit includes integrated mounting flanges for secure installation and a standard shaft designed for seamless fan blade attachment.

Technical Specifications

Voltage	115 V
Frequency	60 Hz
Country of Origin	Indonesia

Design & Construction

Mounting Features

- Integrated mounting flanges
- Standard fan blade shaft

Construction	Fully Enclosed, Metallic Finish, Compact Design
