

Shaft Drive Bicycle

This bicycle features a shaft drive, removing the need for a traditional chain. It is designed with BMX-style handlebars and a durable frame.

Product Overview

Innovative Shaft-Drive System

This bicycle features a specialized shaft-drive mechanism, completely eliminating the need for a traditional chain drive system. Designed for recreational use, the bike offers a clean and low-maintenance riding experience suitable for various casual environments. Its robust frame construction and adjustable components ensure comfort and durability for the rider.
